Subject Failure Recovery Design for Management Flows

## Description of Problem or Suggestion:

It is not clear how the system as designed accomodates or responds to failures of critical management elements (e.g., Master Agent, sub-agent, Deputy, Tivoli, etc.).

## Originator's Recommendation

Describe how the system would respond to failures of each system management element and what, if any, problems can result from these failures. Add this information to the "as-built" 305 documentation.
